
Name:	Jasminka
Surname:	Dimitrova Kapac
Contact email:	jasminka.kapac@gmail.com
Certification in UNIDO methodology (EnMS/SSO/CASO):	EnMS SSO

References:

PROJECT TITLE: Implementation of Energy Management System, EnMS

BENEFICIARY ENTERPRISE: Knauf Radika, Debar

Deliverables and reporting:

FINAL REPORT

PROJECT TITLE: Steam System Optimization, SSO

BENEFICIARY ENTERPRISE: Ko-Gel Sever, Skopje

Deliverables and reporting:

FINAL REPORT

PROJECT TITLE: Improvement of energy efficiency and utilization of renewable sources

BENEFICIARY ENTERPRISE: Rade Koncar – Kontaktori I relei DOO, Skopje

Deliverables and reporting:

1. Preparation of project for energy efficiency with set of measures for the construction and selection of insulation materials to be used for improving the energy efficiency of the building;
2. Preparation of proposal for system for energy efficient lighting, heating, cooling and ventilation;
3. Preparation of a study with proposed solutions for utilization of geothermal energy with heat pumps for storing warm water needed for heating;
4. Preparation of a study for utilization of solar energy with PV (photovoltaic) systems in production of electricity for indoor and outdoor lighting system;
5. Preparation of elaborate for the benefits that the energy efficient building and use of renewable sources will bring to the living environment and natural habitat;

PROJECT TITLE: Assessment of the heating, cooling, ventilation and dust removal system

BENEFICIARY ENTERPRISE: Euroimpeks DOO, Skopje

Deliverables and reporting

1. Summary of the energy consumption rating of the heating, cooling, ventilation and dust removal systems of the Limarski servis;
 2. Summary of the diagnostic plan for measuring air temperatures in the Limarski service area under operating conditions including suction and ventilation equipment and off-site;
 3. Summary of the analysis of the operation of the ventilation, cooling, heating and dust-proof systems of air flow of 70 000 m³/h;
-

-
4. Final report, including techno-economic analysis and investment value of the proposed measures;
 5. One-year action plan.

PROJECT TITLE: Improvement of energy efficiency and utilization of renewable sources

BENEFICIARY ENTERPRISE: Hotel Ambassador- M, Skopje

1. Preparation of project for energy efficiency with set of measures for the construction and selection of insulation materials to be used for improving the energy efficiency of the building;
2. Preparation of proposal for system for energy efficient lighting, heating, cooling and ventilation;
3. Preparation of a study with proposed solutions for utilization of geothermal energy with heat pumps for storing warm water needed for heating;
4. Final report with 1 year action plan

PROJECT TITLE: Steam System Assessment

BENEFICIARY ENTERPRISE: Frotirka , Delcevo

Deliverables and reporting

1. Report on organization:
Summary of steam scoping tools results;
Summary of diagnostic measurements plan;
Summary of steam system assessment tool;

PROJECT TITLE: Improving the energy efficiency of the production and utilization of renewable energy sources

BENEFICIARY ENTERPRISE: ADUT GVN, Kumanovo

Deliverables and reporting

1. Preparation of an energy efficiency project with a package of measures for the construction and selection of equipment that will improve the energy efficiency of the production;
2. Preparation of a feasibility study with the proposed solutions for utilization of renewable energy sources;
3. Final report with an action plan for one year

PROJECT TITLE: Energy Efficiency Action Plan

BENEFICIARY ENTERPRISE: Swisslion Agroplod, Resen

Deliverables and reporting

1. Preparation of an energy efficiency project with a package of measures for the construction and selection of equipment that will improve the energy efficiency of the production;
 2. Summary of steam scoping tools results;
 3. Summary of diagnostic measurements plan;
 4. Summary of steam system assessment tool;
-

PROJECT TITLE: Energy Efficiency Action Plan
BENEFICIARY ENTERPRISE: Swisslion Agroplod, Skopje

Deliverables and reporting

1. Preparation of an energy efficiency project with a package of measures for the construction and selection of equipment that will improve the energy efficiency of the production;
2. Summary of steam scoping tools results;
3. Summary of diagnostic measurements plan;
4. Summary of steam system assessment tool;

PROJECT TITLE: Energy Efficiency Action Plan
BENEFICIARY ENTERPRISE: Elektro Sarri dooel, s. Trebos

Preparation of an energy efficiency project with a package of measures for the construction and selection of equipment that will improve the energy efficiency of the production;

PROJECT TITLE: Energy Efficiency Action Plan
BENEFICIARY ENTERPRISE: Hotel Arka, Skopje

Introduction of Building Management System (BMS), assessment of energy consumption for the whole building and Preparation of an energy efficiency project with a package of energy efficiency measures.

PROJECT TITLE: Energy Efficiency Reconstruction of the building
BENEFICIARY ENTERPRISE: Viteks, textile factory, Delcevo

Preparation of an energy efficiency project with a package of measures for the construction and selection of equipment that will improve the energy efficiency of the production;
